

# MOVIMOT® flexible for ASi retrofits

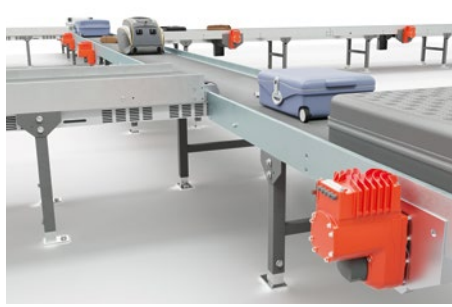

## Possible uses / Typical applications

### Courier, express and parcel logistics

- Belt conveyors
- Roller conveyor
- Sorter

### Airport and baggage handling

- Baggage transport
- Sorting and distributing
- Jamming and buffering

### Intralogistics and storage

- Conveyor units
- Hoists
- Rotary tables

## The advantages at a glance

### Flexible!

Every motor, every controller – regardless of the supplier. MOVIMOT® flexible logistics variant is the ideal solution for your retrofit and adapts flexibly.

### Future-proof!

MOVIMOT® flexible logistics variant as part of the MOVI-C® inverter portfolio is compatible with all old and new motor technologies up to IE5.

### Intuitive!

From the standardized connections to the easily accessible front module, the logistics variant impresses with its simple installation and user-friendly manual operation.

### Reliable!

The logistics variant delivers robust performance. With thousands of MOVIMOT® flexible sold and tested in a wide range of applications, continuous and long-term operation is ensured.

## Overview of the technology

MOVIMOT® flexible logistics variant is the perfect solution for your ASi retrofit projects. It is compatible with all standard AC-motors and supports various ASi profiles. In addition, the standardized connection technology in combination with intuitive on-site operation ensures fast installation and minimal downtime.

This solution is completed with MOVIKIT® ASi LocalMotorStarter Drive, making the transition as smooth as possible. It enables seamless integration into the existing infrastructure and thus ensures optimal performance from day one.

### 1 Intuitive on-site operation

- Manual auto control
- CW-0-CCW

### 2 Diagnostics

- Status LEDs for digital inputs
- Engineering port for handheld keypads and laptops or PCs

### 3 Motor technology

- Compatible with all standard asynchronous motors and synchronous motors

### 4 Easy to use

- All interfaces can be plugged in
- Speed can be adjusted via potentiometer
- Single-cable technology

### 5 AS-Interface

- Supports various AS-Interface profiles
- Compatible with third-party and previous inverters from SEW-EURODRIVE
