

# Power for the big jobs. Economical for the environment.

The IE4 AC asynchronous motors in the DRU.. series are perfect for applications that call for a lot of power – but they are also energy-efficient and economical to run.

up to

## Scalable

IE4 AC motors in a 4-pole design from 0.75 to 375 kW

## Robust

Long bearing service life, high thermal reserves

## Powerful

For challenging tasks, such as in sewage treatment plants, conveying systems, and cement processing plants

## Comprehensive

Large range of compatible accessories from the DR.. modular system of motors, such as brakes, sensors, protection, and much more besides

## Sustainable

When combined with the gear units and intelligent frequency inverters from SEW-EURODRIVE, the IE4 motors work efficiently, reducing both energy consumption and CO<sub>2</sub> emissions throughout the entire product life cycle.
