

Installation and startup

Startup

Your requirements

- **Quick, problem-free startup** of the drive technology
- **Safety** for complex drive technology requirements (e.g. synchronous operation)
- **Optimization** of the drive technology during startup

Our services

- Reviewing customer requirements and target functionality in relation to feasibility
- Advice on the implementation of the customer's target functionality
- Data backup of existing drive electronics
- Comparison of the nameplate data with the project planning data
- Specific inspection of the electrical installation to ensure it is complete, and in relation to compliance with EMC Directives. Recommendations for courses of action will be given as needed.
- Startup, parameterization, and function test of the drive technology components
- Startup, parameterization, and configuration of CCU solutions, e.g. synchronous operation
- Implementation of optimization measures, e.g. adjusting parameters
- Data backup of the drive electronics that have been started up

Optional

- Monitoring the system startup in both no-load mode and production mode
- Instruction and training for the customer's startup and maintenance staff

The services listed above apply exclusively to SEW-EURODRIVE drive technology components.

Your benefits

- **Reduction** of the startup time
- **Fast and problem-free** start of production
- **Maximum reliability** for problem-free production
- **Transfer of knowledge** to the customer's startup and maintenance staff

These figures speak for themselves

Whatever your location in Germany, we're never far away. Our expertise and experience maximize your system availability.
