

New-value repair⁺¹²

Longer service life of the repaired gearmotor – for your security

Premium components for greater security

Sometimes, for various reasons, a gearmotor is not put into immediate use following a new-value repair – it may be that the system is not started up until later, for example, or that the gearmotor is put into storage to serve as a spare part.

With our new-value repair service, we already offer you a 24-month liability for deficiencies, applicable to the entire gearmotor. However, in the case of the examples given above, this is not generally long enough.

With our new-value repair⁺¹² service, we offer you an extra 12 months of liability for deficiencies, applicable to your entire gearmotor*, thanks to our use of the following high-quality and durable individual components:

- **Premium Sine Seal:** oil seal from SEW-EURODRIVE with sinusoidal sealing lip on the motor
- **Premium fluorocarbon rubber oil seal** on the gear unit (output shaft)
- **Premium gear oil:** GearOil by SEW-EURODRIVE for higher gear unit performance

Premium Sine Seal oil seal

Premium fluorocarbon rubber oil seal

Premium gear oil

* Service available for SEW-EURODRIVE gear units, AC motors, and servomotors from current series.

Your benefits:

- Maximum security thanks to a 36-month liability for deficiencies, applicable to your entire gearmotor
- Increased system availability thanks to the longer service life of the repaired gearmotor
- Reduced maintenance intervals (as per the operating instructions) and, consequently, lower maintenance costs thanks to durable individual components from SEW-EURODRIVE

What are you waiting for? Ask us about our new-value repair⁺¹² service.
