We want your drive!**Development and innovation**

Do you want to apply your expert knowledge to make something good even better? We bring together mechanics, electronics and information technologies. You could work in an interdisciplinary environment on forward-looking areas such as intralogistics, electric mobility and energy efficiency.

Sales and service

You could advise customers from a wide range of industries around the world and develop technically demanding solutions. Or, you could work as a product manager with responsibility for the entire process from product definition to international market launch. Outstanding advancement opportunities and a whole lot of variety await you!

Software development and IT

Enjoy a first-rate IT environment, with a cutting-edge data center, extremely well equipped workstations and varied IT and software projects that are all part of everyday working life. You'll be amazed at the sheer variety of roles available – from integrating current SAP modules and developing intuitive user interface designs through to working on the product development of innovative components and systems in the embedded environment.

Many more opportunities

We offer the best opportunities for career-starters and professionals in other areas, too. Work as a controller, financial accountant, or cost estimator in finance and accounting or join our purchasing, marketing or HR management team. We offer numerous prospective careers with great scope for personal initiative.

We have even more to offer – just take a look!

**We drive the future.
And have done so for over 85 years.**

Without our drive technology there would be a lot less movement in the world: Whether gearmotors, frequency inverters or industrial gear units, our solutions are used all over the world in applications ranging from gravel plants and conveyor belts to industrial processes and roller coasters.

Our headquarters in Bruchsal offers you an attractive environment where you can live the kind of life you want, whether in one of the bustling nearby cities or an idyllic spot in the countryside. Karlsruhe is a center for technology where industry, research and education are all interconnected in one outstanding network.

**You are driving the future.
Now.**

Discover the opportunities that await you at SEW-EURODRIVE. Whether you are an experienced professional or a career-starter, we see you first and foremost as a person – one in a lot of very interesting areas.

As an international family-owned business, we offer you outstanding prospects for finding a safe job in an exciting environment.
