

DRIVING THE FUTURE

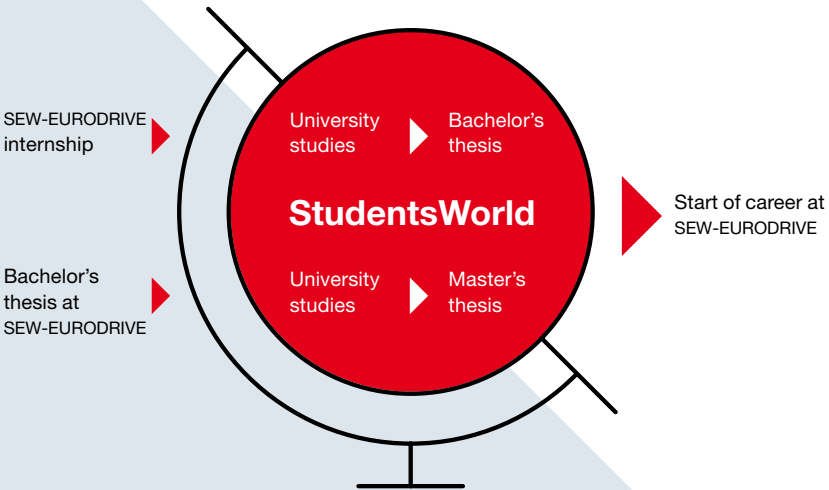

StudentsWorld:

The student advancement program

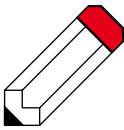

Even more drive. Thanks to StudentsWorld.

We are determined to support the commitment and skills of prospective engineers and IT specialists. That is why we launched StudentsWorld, an advancement program that runs in parallel with your studies. It will encourage you on a personal level and accompany you during your studies on your path to success.

Members of the StudentsWorld program are first in line when it comes to awarding a student work placement or an internship abroad at one of our subsidiaries. We will also work with you to find an exciting topic for your thesis, discussing the options in regular meetings about your prospects. Drive your future – at SEW EURODRIVE.

Take the first step by completing an internship or Bachelor's thesis with us. Impress us, and we'll be by your side through StudentsWorld till you start your career. Drive your own personal future at SEW-EURODRIVE.

How we drive the future.

What we offer.

- ✓ One-on-one support from a personal sponsor
- ✓ Workshops and seminars on professional and personal development
- ✓ Intensive support for planning your career, e.g. during regular meetings to discuss your prospects
- ✓ Establishing a network within the company
- ✓ Financial recognition for excellent performance during an internship or Bachelor's thesis
- ✓ Additional practical experience, e.g. in the form of a student work placement
- ✓ Additional events such as presentations, visiting trade fairs and plant tours
- ✓ Information about SEW-EURODRIVE and suitable job vacancies

How you help us drive the future. Your profile.

What we need from you:

- ✓ You will be studying electrical engineering, mechanical engineering, mechatronics, IT or very closely related courses
- ✓ You will have successfully completed at least three semesters of your course
- ✓ You will have good grades (average of at least 2.5)
- ✓ You will have a good command of English
- ✓ You will have completed at least a five-month internship or a Bachelor's thesis at SEW-EURODRIVE

And you will have impressed us with your personality and your drive ...

- ... by doing fantastic work that has persuaded your SEW supervisor to recommend you
- ... in your own personal motivation letter
- ... through your passion for technology – which will be infectious!

**DRIVING
THE
FUTURE**

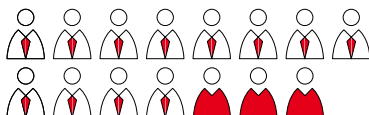

MAKE YOUR NEXT
MOVE WITH US

We drive the future. And have done so for over 85 years.

Without our drive solutions there would be a lot less movement in the world: Our gearmotors and frequency inverters, servo drive systems, industrial gear units, and many more solutions are used internationally. This also includes intensive service and consulting.

Over

17 000

employees

worldwide in 50 countries keep things moving, and some 5 300 of them are based in Germany.

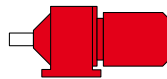

140

students

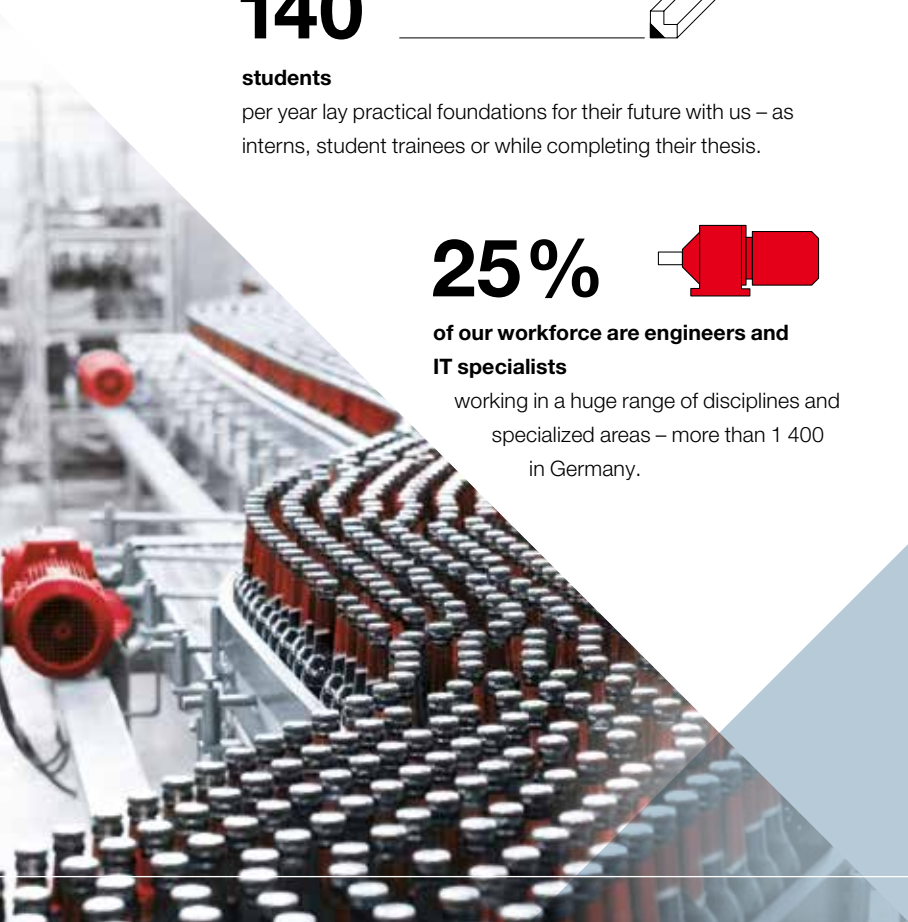

per year lay practical foundations for their future with us – as interns, student trainees or while completing their thesis.

25%

**of our workforce are engineers and
IT specialists**

working in a huge range of disciplines and specialized areas – more than 1 400 in Germany.
