

Driving the world

Company profile

FOREWORD

SEW-EURODRIVE stands for product orientation based on its modular system, for process orientation with precise coordination of consulting, product, delivery time, training and service support, and for a future focus with highly developed expertise that feeds the development of the various areas and every single product.

Moving this world takes a very special kind of drive – the people at SEW-EURODRIVE. They are what makes the company what it is, with their dedication, dynamism, creativity and a willingness to keep developing themselves and the products.

All these combine to create real added value for you, our partners and customers, that always goes beyond the product itself. Our offering is customized to you and tailored to your needs. No matter what your line of business may be.

Let us move your world together.

Greetings from Bruchsal.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Blickle', written over a thin horizontal line.

SUCCESS IS WHAT DRIVES US

**It all starts with courage
and pioneering spirit.
87 years ago.**

87 years of SEW-EURODRIVE started with an ingenious inventor: Albert Obermoser. His gear motor, designed in 1928, revolutionized drive technology. Christian Pähr, a trained banker, recognized the enormous potential of that modern drive design and, in 1931 – in the middle of social and political turmoil – he took a bold step and founded a company that would go on to set new standards and change the world of mobility: The Süddeutsche Elektromotoren-Werke in Bruchsal, SEW. Its 16 employees produced electric motors and gearmotors, electric band and circular saws and grinding motors on site in Nordbaden.

The success story continues

In 1945 – Central Europe is in ruins – Christian Pähr's son-in-law Ernst Blickle took overall responsibility of SEW-EURODRIVE. Under his leadership, a new milestone of drive technology was achieved in 1965: The implementation of the modular concept for gearmotors. The basic principle still remains the foundation of our broad portfolio – from high-quality individual components to intelligent complete solutions – and gives us a decisive advantage over our competitors. Following the death of Ernst Blickle in 1986, his wife Edeltraut took over as Managing Partner of SEW-EURODRIVE and again set the course for the company's future orientation.

SEW-USOCOME, Haguenau, France

SEW-EURODRIVE INC., Lyman, South Carolina, USA

SEW-EURODRIVE Co., Ltd, Tianjin, China

From local player to global leader

SEW-EURODRIVE's first international production plant was set up by Ernst Blickle in Haguenau, France, in 1960. It was followed by many more plants and branches. Blickle's sons Rainer and Jürgen have been driving the company's international goals onward since 1987 in a consequent and very successful way: The company's status as a global player is being expanded further step by step.

One very special step was the foundation of SEW-EURODRIVE INC. in Lyman/USA. Together with the company headquarters in Germany and the subsidiary in China, it is one of our most important locations. Today we are looking at 15 production plants and 77 Drive Technology Centers in 50 countries, offering products, solutions and services for a host of customers from different industries: from the automotive industry to transportation, logistics and mining. Always true to our motto: Driving the world.

Jürgen Blickle,
Managing PartnerRainer Blickle,
Partner

Driving the World

Well positioned for the future

That ability to adapt to the demands of an ever changing market has been a significant factor in further affirming and expanding our company's position as a market leader. The many awards SEW-EURODRIVE received over the years bear witness to this process – from the “Kundenchampion®” (Customer Champion) to the Environmental Technology Prize Baden-Württemberg. Our vision for the future is “Industry 4.0: from smart factory to smart company” – of course with drive and automation technology by SEW-EURODRIVE. The goal is to combine the “new” concepts of Industry 4.0 with the established principles of Lean Management and thus connect all parties involved in the value creation process: people, technology and the product. This is not just restricted to technological innovation, but also incorporates a creative value creation process with the employee front and center in a “conducting” role.

Such contemplation is not just pure theory at SEW-EURODRIVE, which is best shown by the showcase factory in our production and logistics plant in Graben-Neudorf. It illustrates logistics processes which were created with flexible, autonomous logistics assistants based on the principles of Industry 4.0. It utilizes our complete modular technology system – from simulation to drive technology and the complete control and automation technology, navigation and tracking, energy supply and storage, all the way to visualization and object-oriented parameterization.

PRODUCTS AND SOLUTIONS

SEW-EURODRIVE – Premium drive technology for all applications

Drive technology from SEW-EURODRIVE is a fixture in modern mechanical and plant engineering. The proven modular system ensures that all components are fully compatible. This allows you to construct highly complex drive architectures that deliver maximum performance under any conditions. Our uniquely diverse product portfolio combines high-quality mechanics, sophisticated electronics and application-specific IT components to give our customers around the globe real competitive advantages. This goes for all our components, systems and solutions.

Customized and multifunctional – our gear units, motors, gearmotors and inverter technology

Each gear unit, motor, gearmotor or frequency inverter is genuinely unique. We customize these high-power components to each buyer's specific requirements and applications. Our modular systems can be fitted to all sizes and power ranges thanks to the exceedingly fine graduations. That makes our drive components real all-rounders that adapt perfectly to their tasks.

Powerful, robust and reliable – our industrial gear units

Many industrial applications require heavy loads to be moved safely, reliably and at high torques. SEW-EURODRIVE has a broad range of innovative and reliable industrial gear units for heavy-duty applications such as mining, wood processing, process engineering and construction materials production. A modular system allows our powerful components to be customized to your requirements. Our powerful, robust industrial gear units excel even under extreme conditions.

Intelligent systems – our decentralized drives and mechatronics

SEW-EURODRIVE is a pioneer in decentralized drives and mechatronics. We realized early that modern system architectures and their particular design traits require customized drive solutions. We have reacted to these market demands by developing autonomous, efficient systems that do not require a control cabinet. Drive solutions like our MOVIGEAR® mechatronic drive system are now the standard for decentralized drive technology: These modular, flexible, cost-effective and energy-efficient solutions meet the essential requirements of modern automation technology.

High-precision performance – our servo drive technology

Modern production plants or intralogistics are just a few of the areas that require maximum dynamics, flexibility, precision and profitability. Our servo drive technology is ideally designed for these demanding requirements. Our versatile product portfolio is designed for practical use, allowing safe and accurate implementation of complex processes and system architectures. Servo drive technology by SEW-EURODRIVE exemplifies the power of modern, brand-name drive engineering. For any applications, worldwide.

Compatibility and functionality at all levels – how we can help you complete your application

Drive technology by SEW-EURODRIVE is aimed at sustainability and lasting customer benefits. Our full-scale solutions include drive components, control technology and a plethora of other components to round out your application solution. From industrial communication and safety technology to operation and startup, they meet our customers' requirements. The result is drive solutions from a single source whose cost-effectiveness and practical benefits impress customers at every phase in the project.

CORE COMPETENCIES AND CUSTOMER BENEFITS

An eye on the future – research and development at SEW-EURODRIVE

SEW-EURODRIVE has been setting standards in drive engineering for 87 years. Our worldwide success is based on innovation, an effect of consistent research and development. The Ernst Blicke Innovation Center (EBIC) in Bruchsal exemplifies this mentality. It is where ideas turn into finished drive system components that let us build exactly the innovative drive solutions our customers expect. Intricate development processes and research collaborations with renowned partners allow us to play a key role in shaping the future of drive technology.

Services along the system's entire life cycle

As a specialist in drive technology, we never stand still. Not only are we constantly optimizing our own processes, but we also offer our customers a comprehensive range of services for the system's entire life cycle. We would like to support you in this by providing you with the service you need right now and giving you the best possible assistance. This might involve personal support with project planning and design during your planning and engineering phase, or it could be a comprehensive range of repair services, including picking up the components, during the utilization phase, if things are urgent. Just Life Cycle Services!

Consistent and thorough – our quality management

Quality is our customers' greatest benefit. As a trusted brand name in drive technology, SEW-EURODRIVE sets great store by its consistent quality management, which ensures that our customers worldwide enjoy maximum operational reliability. Our entire production strategy is based on this ambitious goal. From start to finish, our production processes implement the zero-defect principle. We use state-of-the-art measuring procedures to repeatedly check the quality of every single part. This allows us to set new standards and fulfill all statutory provisions, even for products with functional safety characteristics.

On site worldwide for our customers – our global production and service network

SEW-EURODRIVE thinks globally and acts locally. We created the ideal base with our global network of 15 central production plants and 77 Drive Technology Centers across 50 countries. Our goal: ensure short delivery times and fast service for our customers the world over, while taking the specific requirements of the local markets into account. With that in mind, we founded our first plant outside of Germany in Haguenau, France, in 1960. The results of this bold step in the years that followed now benefit our customers across the globe.

Qualified and accessible – market-oriented sales – made by SEW-EURODRIVE

No product in the world is so good that it finds its own customers. SEW-EURODRIVE's unique solution portfolio rests on a close-knit sales network of drive engineering specialists with solid industry knowledge. From planning to startup and beyond – we value close contact to our customers. We focus on things that matter, to the benefit of everyone involved. At the same time, we always bear in mind the specific characteristics of the individual market and work closely with regional partners.

Drive technology – made by people

SEW-EURODRIVE's successful products, solutions and services originate from the minds of its employees. Their skills, commitment and motivation are the essence of the SEW-EURODRIVE family business. This is why we ensure that our employees work in a motivated environment and have all they need to achieve their potential. This approach benefits both our company, and our customers, world-wide. The impressive results create real added value and secure measurable competitive advantages on an increasingly complex marketplace.

AMBITION AND OUTLOOK

Sustainable and innovative – focused on the future

Future orientation: This is what drives us at SEW-EURODRIVE. For us, this not only involves the development of modern and groundbreaking solutions, but also thinking one step ahead. It means to consider environmental compatibility, to make future-proof decisions, and to be aware of a special responsibility: sustainable entrepreneurship. Sustainability is more than a buzzword for us – it is an inherent part of our philosophy and extends across all divisions.

Our courage to have a vision, and to put it into action, includes economical, ecological, and social sustainability. In the spirit of a true "Green Company", we are using a holistic approach in all areas of SEW-EURODRIVE. We consider our employees, partners, and suppliers, and we strive for fairness in all our dealings with them.

Outstanding – SEW-EURODRIVE’s commitment to sustainability

Resource-conscious actions are one of the declared objectives of our philosophy. Our focus is not only on the environment, but also on the people and the economic aspects in our company. SEW-EURODRIVE banks on the development of energy-efficient products, trusts a production

strategy that is based on conserving valuable resources, relies on a modern logistics concept of short distances, and supports an innovative HR management that secures valuable knowledge and real talent for the company.

Our goal is to foster traditions and innovation, to reduce costs, and to invest in the future, while negotiating good prices and fair conditions, and meeting challenges both individually and as a team. We regard this as an investment in the future of SEW-EURODRIVE and as our contribution to society – always with a clear focus on people.

**DRIVING
THE
FUTURE**MAKE YOUR NEXT
MOVE WITH US

Driving the future together! **SEW-EURODRIVE – an excellent employer**

An innovative industry pioneer like SEW-EURODRIVE needs dedicated employees. In our company, it's all about the people. Our employees experience this every day in the respect with which they interact with one another. As a result, we are always able to offer our

customers the best solution – and our employees the best prospects in any area and at any career stage. We keep things moving – even in employee development. In keeping with the sustainable focus of our company management, we foster the individual potential of each of our specialists. We emphasize vocational and continuing training as well as targeted development measures for our employees, from individual on-the-job training and support, through career options for management staff and experts, to modern learning infrastructure that promotes lifelong learning.

The DriveAcademy®, our in-house education facility, provides a wide variety of learning and training options. In addition to conventional classroom courses, it offers numerous digital learning options that provide training when, where, and how it is needed. The learning culture this promotes offers a framework for self-directed learning or for knowledge and experience to be transferred.

The health and wellbeing of our employees is very important to us. Whether it takes preventive health provisions, activities for maintaining health, or occupational safety measures, our **company health management program, vital360°**, covers everything from health-conscious management and athletics programs to workplace ergonomics.

The program is founded on a set of collectively developed health guidelines that are intended to encourage each individual to take action for their own health.

Another important concern for us is reconciling **family and career**. We offer our employees tailored, flexible work schedules and an in-house daycare facility for children. Concrete benefits, including above-average pension provisions and much more, are also par for the course with us, and part of what has won us several awards as an employer.

All these measures get us ready for the future and are essential to helping us secure our position in a highly complex market environment.

SEW-EURODRIVE – a global player with a strong background and persuasive results

Sales development over the last 10 years (in euros):

SEW-EURODRIVE – there for you locally around the world

A company with potential and traditions

- An owner-operated global family company for 87 years
- Founded in 1931
- Represented around the world in 50 countries and on five continents
- Production and service power in 15 production plants and 77 Drive Technology Center locations
- Headquarters in Bruchsal, Germany

SEW-EURODRIVE – we can always count on our employees

Total number of employees

- As of 2017, over 17 000 employees in manufacturing plants, Drive Technology Centers and Sales offices worldwide
- More than 1400 engineers in a wide variety of technical disciplines and specialized fields
- About 600 researchers and developers in Innovation, Production and Process Management
- About 140 students each year working on internships, training positions and final theses
- About 15 students in our own StudentsWorld advancement program
- About 180 trainees in the industrial and commercial sectors, plus 70 cooperative education students

Development in the number of employees worldwide over the last 10 years

Final theses and internships in 2017

- 60 final diploma, Bachelor's, Master's, and doctoral theses
- 57 internships
- 13 theses as part of continuing technical training

Sustainability and looking to the future at SEW-EURODRIVE

Our social responsibility

- SEW-EURODRIVE takes its commitment to the guidelines of the Global Compact of the United Nations seriously and implements it worldwide.
- In 2016, we published our own SEW-EURODRIVE Code of Conduct. As a family company active worldwide with an 87-year tradition, we bear great responsibility – toward our employees, our customers, our suppliers and the public – and strive to meet it. This responsibility includes abiding by applicable laws, respecting core ethical values, and basing our actions on the ten core principles of SEW-EURODRIVE.

Our responsibility toward our employees

- Our annual health day in Bruchsal and Graben-Neudorf offers all the necessary information about health: from presentations on stress prevention through physical checkups and cooperative activities all the way to a mobile massage facility. The ultimate aim of these events is to get our employees active, involved and enthusiastic about the topic of health.
- Individual, flexible working hours and an in-house daycare facility for children help our employees reconcile career and family.
- Our development programs and career models (management and expert careers) serve to systematically promote our employees' professional, technical and personal development. We also believe in sustained, effectual encouragement of the next generation of talent.

- With regard to learning and development, we rely on advanced technologies and offer flexible, multifaceted educational opportunities to support everyday learning. Our educational program is multi-layered and covers a range of topics, including highly specific details of products and technologies, IT content and practical knowledge, and working techniques and project management skills.
- Subsidized food at our company restaurants in Bruchsal and Graben-Neudorf and at our locations Germany-wide.
- Tangible benefits: from excellent compensation, through outstanding company retirement provisions, to bonuses on special personal occasions.
- A diverse athletic and recreational program that gets renewed each year by our trainees strengthens our company cohesion and sense of community.
- Adherence to all safety-relevant regulations and guidelines is a top priority at SEW-EURODRIVE. Our employees are provided with all the information necessary for this purpose as well as numerous practical tips.
- In particular, we want to interest young people in SEW-EURODRIVE, so we offer them a multitude of opportunities to get to know us. These include an annual "Girls' Day", information evenings about cooperative education programs, "Training Day", company representation at various training fairs, and many programs such as internships, lectures, plant tours, and "SEW Days".

- People with severe disabilities are integrated quite naturally by SEW-EURODRIVE into our shared working life in the course of training and employment.
- We offer individual support for our employees who are differently abled or have complaints and limitations, and we provide them with plenty of assistance in setting up their workplaces and designing their work environments.
- We rely on target-oriented and consistent cooperation with universities, technical colleges, and other career-oriented institutions of higher education.
- Our university marketing activities include plant tours, SEW Days with specialist lectures, and project topics and professional contributions in the form of lectures, seminars, and conventions. Our drive technology seminar, for example, is geared toward university students and held on a regular basis.
- Our work-study program, StudentsWorld, supports graduate and undergraduate students who have had particularly successful internships or theses at SEW-EURODRIVE.

Our cooperation agreements and network partnerships

- With "StodiumPlus," we have entered into a long-term cooperation with the Mechanical Engineering, Mechatronics and Electronics departments at the Technical College in Karlsruhe, Germany. StodiumPlus is a cooperative education program that combines a bachelor's degree from the college with professional training at SEW-EURODRIVE.
- We have established working groups on the topic of drive technology at trade schools in various German states.
- Our cooperative endeavors with various universities and colleges include the following:
 - Supporting foundational education and selected research projects relating to electric drive technology
 - Various collaborations with the Karlsruhe Institute of Technology KIT
 - Dialog and exchange with the CyberForum in Karlsruhe

Corporate citizenship

- In the SEW-EURODRIVE Foundation, we have established an institution whose goal is to effectively encourage scientific work and important research projects in the areas of technology and business.
- The SEW-EURODRIVE Foundation awards an annual prize for graduate students as well as the bi-annual Ernst Blickle Award for outstanding scientists.
- We at SEW-EURODRIVE support a multitude of institutions and educational establishments with donations and contributions.

Our sustainability projects worldwide

- We at SEW-EURODRIVE encourage environmental protection measures such as waste separation and recycling.
- We fully embrace the use of energy-saving measures and the latest technology in order to considerably reduce the energy consumption at our locations worldwide. This applies especially for potential savings of high-energy systems in the areas of production, air conditioning and heating.
- In cooperation with local organizations and institutions, we help people in need.

Our responsibility for the environment

- We at SEW-EURODRIVE regard sustainability with respect to the environment as one of the pillars of our corporate philosophy.
- In new building construction projects and renovations at all of our worldwide locations, we make use of state-of-the-art technology to protect the climate and save valuable resources.

- For our products, we use only environmentally friendly materials and resources, and at all production levels, we avoid the use of problematic substances that harm the environment. Thus we comply at every level with the valid laws and guidelines of the German federal government and the EU, such as the law on electronic devices and the EU RoHS directive.
- We make investing in the development of sustainable and energy-saving products a priority. Such products include AC motors with an extremely efficient copper casting technology and the effiDRIVE® energy saving scheme.
- Even during the planning and development of our products, we take care to optimize their recyclability and promote the reusability of the raw materials and resources used.
- Since 2008, we have been an official partner of the GoGreen program of the Deutsche Post.
- On September 1, 2010, SEW-EURODRIVE began cooperating with ClimatePartner, an environmental consultancy firm, to ensure that all of its printed materials are produced carbon-neutrally.
- In 2009, our state-of-the-art assembly plant in the South Indian city of Chennai was the first green factory commissioned in the drive technology sector in India.
- The new industrial gear unit plant that we opened in Bruchsal in 2010 implements a sustainable overall model whose technical capabilities reduce annual CO₂ emissions by 1381.5 metric tons and save up to 1.5 billion liters of fresh water.
- 2010 saw SEW-EURODRIVE commission further climate-friendly plants and partial systems with modern environmental protection technology in the French city of Haguenau and in the Brazilian city of Indaiatuba.

Milestones of our history at a glance

1931

Christian Pähr founds “Süddeutsche Elektromotoren-Werke” in the town of Bruchsal in Baden

1945

Ernst Blickle, father of current owners Rainer and Jürgen Blickle, takes over management

1960

Construction of the first foreign production plant in Haguenau, France, and the establishment of the first foreign subsidiary, SEW-USOCOME SA

1968 to 2011

Establishment and expansion of production locations in 45 countries around the globe

1965

Development of the revolutionary modular system of gearmotors

1968

Foundation of the first Drive Technology Center

1972

Goal-oriented expansion through takeover of the Obermoser Group

1975

The foreign subsidiary SEW DO BRASIL Motores-Redutores LTDA is established in Sao Paulo, Brazil

1983

The US subsidiary SEW-EURODRIVE INC. is established in Lyman, South Carolina

1987 to 1989

Rainer and Jürgen Blickle take over as managing partners of the SEW-EURODRIVE Group

1989

Edeltraut Blickle, wife of Ernst Blickle, establishes the SEW-EURODRIVE Foundation

1990

Goal-oriented expansion through the acquisition of a majority interest in Pfeffer & Partner Getriebebau GmbH in Östringen, Germany

1992

The subsidiary SEW-EURODRIVE S.A. is established in Forbach, France

1993

SEW-EURODRIVE is certified according to ISO 9001 quality management

1994

Market launch of the innovative SPIROPLAN® series of gearmotors

1994

Goal-oriented expansion into Asia with the establishment of the subsidiary SEW-EURODRIVE Co., Ltd. in Tianjin, China

1994

Expansion into Northern Europe through the acquisition of shares in Finnish company Santasalo Ltd. in Helsinki

1995

Market launch of the pioneering 7 series of gear units

1997

The production plant in Haguenau, France, wins the coveted Factory of the Year – Industrial Excellence Award

1997

Market launch of the revolutionary MOVIMOT®, MOVITRAC® 31C, MOVIDRIVE® and MOVIDYN® electronic control components

1998

Market launch of the innovative MOVI-SWITCH® design, the CT/CV series of asynchronous servo motors, and the power-optimized SEW-SANTASALO planetary gearmotors

1999

A new electronic components production plant is opened in Bruchsal

2002

Market launch of the DC/CM series of synchronous servomotors

2002

Introduction of the customer-oriented Complete Drive Management CDM® solution

2002

The innovative MOVITRANS® system opens up new horizons for contactless energy transfer

2003

SEW-EURODRIVE opens the Ernst Blicke Innovation Center, or EBIC for short, in Bruchsal. It is the company's central research and development location.

2004

A new Service Competence Center opens in Graben-Neudorf, Germany

2004

Market launch of SEW-EURODRIVE's BSF series of helical-bevel servo gear units, PSF/PSKF and PSBF planetary servo gear units, and synchronous linear motors

2005

The MOVIGEAR® mechatronic drive solution and the MOVIPRO® frequency inverter for decentralized applications arrive on the market

2005

Market launch of the MOVIAXIS® and MOVI-PLC® systems along with the MOVITOOLS® MotionStudio software toolkit

2005

SEW-EURODRIVE grows to 10 000 employees worldwide

2006

Market launch of MOVITRAC® B frequency inverter and the CMP series of synchronous servomotors

2006

SEW-EURODRIVE celebrates its 75th anniversary and the opening of the DriveAcademy®

2006

Market launch of the EMS system toolbox for industrial electrified monorail applications

2007

Market launch of the DR.. motor modular system, PSC planetary servo gear unit series, CMS electric cylinder, series X industrial gear units and the MOVIFIT® drive controller

2007

Market launch of the modular system for automated guided vehicle systems (AGV) and the MOVIVISION® software solution

2007

SEW-EURODRIVE introduces the CDS® Complete Drive Service service program

2008

Ground is broken for the new industrial gear unit production facility in Bruchsal

2008

Global launch of the DR.. motor modular system

2009

SEW presents the DriveBenefits service portfolio to its customers for the first time and introduces it to the market that same year

2010

The new large gear unit plant is opened in Bruchsal

2011

Introduction of MAXOLUTION®, predefined application packages, and custom system solutions

2013

Market launch of DR...J synchronous motors (LSPM technology IE2, IE3 and IE4)

2014

Jürgen Blickle takes over as Managing Partner at SEW-EURODRIVE, following his older brother, who steps down to the role of a partner due to old age

2014

Market launch of MOVI4R-U® simple inverter

2015

With the inauguration of the new plant in Brumath, France, in February of 2015, SEW-EURODRIVE prepares to grow further and shorten delivery times in the French and European markets. Brumath is the third production and assembly location in France.

2015

Market launch of DRN.. motors (IE3) and double brake with functional safety

2015

SEW-EURODRIVE breaks ground for general developments that include the construction of a new electronics production facility at the Bruchsal site and the expansion of the production location in Graben-Neudorf

2015

Market launch of the mechatronic industrial gear unit (MIG)

2016

The Brazilian production location is certified in accordance with IEC80079 and IEC60079 standards, which includes certification of the EDRS.. and EDRE.. motors according to Brazilian Regulation No. 179

2016

Market launch of the MOVI-C® modular automation system

Top awards for outstanding achievements

We work every day to develop our products, services and solutions further, and to come up with new ones for our customers. As you can see from the numerous awards we have received, the work pays off.

2000

“Best Factory of the Year” award is received from the publication “Wirtschaftswoche” and the INSEAD management school for the electronics production plant in Bruchsal

2001

“TOP Newcomer 2001” award is received from the German Ministry of Research and Technology for technology-oriented visitor and information programs

2002

Market Engineering Award for “Best Manufacturing Strategy” is received from the consulting company Frost & Sullivan

Gold and silver awards are received from the readers of the US trade journal Plant Engineering in the category “Motors, drives, controllers” for drive systems for decentralized installation and in the category “Drive technology / power transmission” for the TorqLOC® mounting system

2003

“European Drive Vendor of the Year 2003” award is received from the consulting company IMS Research for the best products and best service

“Service Leadership Award” in the gear unit and gearmotor market is received from the consulting company Frost & Sullivan

2004

“TOP Honor Prize 2004” is received from the German Ministry for Economic Affairs and Employment in the course of the TOP company meeting

2006

“Business Development Strategy Leadership Award 2005” is received from the consulting company Frost & Sullivan

2007

“Service Management Prize” is received from the customer service association Kundendienstverband e.V. for the CDS® service toolkit

“Top Plant Award” received from the US trade journal Plant Engineering for the production plant in Lyman, South Carolina

“Best Product Award 2007” in the category “Drives and accessories” received from the readers of the trade journal “Process Engineering and Automation” for MOVIFIT®

2008

“Frost & Sullivan Award” received for MOVIGEAR®, the product innovation of the year 2007

“Germany's Customer Champion 2008,” gold award, received for being one of 50 companies with outstanding customer management

“GWA PROFI 2008,” a B2B brand prize for communication, received from the GWA association of communication agencies

2009

“Germany's Customer Champion 2009” award received in silver plus special prizes for “Best B2B Company,” “Best Company with more than 500 Employees,” and “Best Producing Company”

2010

Bavarian State Prize “eCarTec Award 2010” for electric mobility received in the category “Energy, infrastructure, and connection technology”

2011

“Best Employer Brand Award 2011” in the category “Hidden Champion” received from the management consulting company Batten & Company

Silver and bronze environmental technology prizes of Baden-Württemberg received in 2011 in the categories “Energy efficiency” and “Measurement and control technology”

Gold award in the “Charging Technology” category in the German national contest “Vision – Electromobile City of the Future” received for SEW-EURODRIVE's contactless charging system for electric vehicles

NEO2011 innovation prize from the Karlsruhe technology region for outstanding achievements in the mobility sector received for SEW-EURODRIVE's innovative contactless charging system for electric vehicles

2012

SEW-EURODRIVE achieves third place in the contest “Germany's Customer Champions 2012” and receives special awards for “Best Industrial Company” and “Best B2B Company”

2013

SEW-EURODRIVE is among the founding companies of the New Automation association for providing schools, colleges and universities with high-tech equipment. The association was founded as an initiative of the German Electrical and Electronics Manufacturers' Association (ZVEI) with the objective of helping educational institutions to plan and implement practical projects in the fields of electrical automation technology and IT.

2014

“Sustainable Production Award 2014” in the category of drive and fluid technology for the new MOVI4R-U® inverter. The evaluation was based on the criteria of saving resources, environmental compatibility, and the product’s level of technical innovation and cost-effectiveness.

2015

SEW-EURODRIVE is one of fifteen companies in the region of Germany, Austria and Switzerland to receive the Candidate Experience Award 2015. Our company performed very well, especially in terms of reapplication and recommendation figures.

Excellent recruiting: SEW-EURODRIVE received first prize for “Best Recruiter 2015/16” in the Mechanical & Plant Engineering segment and fourth place overall of 504 of the top employers in Germany.

The “Drive Power Solution” energy storage system secured second place in the “Companies with more than 100 employees” category at the Intec Awards 2015.

The vital360° health management program was awarded the seal of excellence in the 2015 Corporate Health Awards.

2016

At the 4th Industry 4.0 Convention on November 30, 2016, in Ulm, Germany, SEW-EURODRIVE won in the “Lean & Industry 4.0” category of the Industry 4.0 Award 2016.

SEW-EURODRIVE received the Diamond Star 2016 award. The drive automation specialist won in the category “Group sales between 1 and 5 billion euros” for its pioneering work in the field of digitization of production operations. The “Best Industrial Business Solution 4.0”

was presented during the Handelsblatt's “Industrial summit” annual conference in Stuttgart.

SEW-EURODRIVE placed in the top 10 at the “Top Service Deutschland” award

SEW-EURODRIVE’s new “Safe Distance Monitoring” safety function impressed the judges and won second place in the “Quality and Safety” category of the Handling Awards 2016.

2017

After its previous win in 2015, SEW-EURODRIVE won the Candidate Experience Award for recruiting quality and satisfaction with the application process once again in 2017.

For the Corporate Health Award 2017, a day-long official audit of our health management system vital360° showed that we had improved even further. We were particularly pleased to score as one of the finalists in the “mechanical engineering / heavy industry” category. This means that we can continue to count ourselves among the healthiest companies in Germany!

2018

SEW-EURODRIVE received the Industriepreis 2018 award in the category “Drive and fluid technology” for the Premium Sine Seal radial oil seal. This prize is awarded to very advanced industrial products with particular economic, social, technological and ecological value.

We were distinguished as a Fair Company 2018. This seal shows that we take responsibility for our employees and strive to inspire enthusiasm even in our interns and young talent.

At home in every market in the world – certified quality from SEW-EURODRIVE

Among other things, we use:

Energy-saving regulations, energy efficiency classes

International: IE2, IE3, IE4

China: Grade 3

Approval certificates, test labels

Europe: CE

Russia: EAC

China: CEL, CCC

USA: UL, UR, ee

Canada: CSA, CSAe

Brazil: ENCE

South Korea: REELS

Explosion protection

Europe: ATEX (2014/34/EU)

International: IECEx (standard gearmotors with EDR.. motors)

USA and Canada: Hazloc-NA® (Hazardous Location North America)

EISA 2007 or CSA C390-10

Eurasian customs union Russia / Belarus / Kazakhstan / Armenia: TR

CU (startup of explosion-proof products)

Occupational safety, machine safety

BGV B11 (Occupational safety – Electromagnetic fields)

EN 61800-3 (Electric drives – EMC limit values)

EN 61800-5-2 (Electric drives – Functional safety)

EN ISO 13849-1 (Safety of machines/controllers)

IEC 61508 (Functional safety)

Additional guidelines, design specifications, and standards

EN 61884 (Aerial lines)

EN ISO 9409 (Industrial robots – Mechanical interfaces)

ISO 14644-1 (Air purity class 1)

IEC 61131 (Programmable logic controllers)

IEC 61131-3 (Programmable logic controllers/language)

DIN ISO 10816-1 (Mechanical vibrations)

Services for the entire system life cycle

We support you with comprehensive service solutions for the entire system life cycle, from the orientation phase through planning and engineering to modernization. Our Life Cycle Services will meet your requirements at every phase and provide just the solutions you need.

Orientation

The following services are available to you:

Personal consulting on

- Trends and future issues
- Rules and regulations
- Application and industry knowledge
- Knowledge transfer
- Sharing of information at innovation level

Supporting tools & resources:

- Website
- Data and documents
- Specialist articles and newsletters
- Social media channels
- Trade fairs and customer events

Planning & Engineering

The following services are available to you:

- Concept creation
- Project planning and design
- Engineering
- Maintenance and operating concepts
- Training
- Variant management

Supporting tools & resources:

- Product configurator
- Energy efficiency tools
- Variant management
- Safety technology selection aid
- Planning and configuration tool (Workbench)
- CDM® database
- SISTEMA software utility

Procurement & Delivery

The following services are available to you:

- Delivery service
- Intelligent material flow
- Electronic data interchange (EDI)
- Electronic billing
- Electronic dispatch notification

Supporting tools & resources:

- Transaction overview
- Shopping cart/request for quotation or order

Installation & Startup

The following services are available to you:

- Installation consulting
- Application programming
- Commissioning

Supporting tools & resources:

- MOVITOOLS® Motion Studio
- MOVIVISION®
- MOVISUITE®
- MOVISAFE®
- Software LT Shell
- Libraries and application modules

Utilization

The following services are available to you:

- Production monitoring
- Remote service
- Repair
- Inspection and maintenance
- Spare parts service
- Pick-up and delivery service
- Express assembly
- Condition monitoring
- 24h service hotline
- Energy management

Supporting tools & resources:

- Energy-efficiency tools
- Variant management
- Troubleshooting
- Replacement parts or replacement product selection
- Scope diagnostic function
- CDM® database

Modernization

The following services are available to you:

- Retrofitting

Supporting tools & resources:

- Use our resources and tools from the phases “Orientation” and “Planning & Engineering”

The DriveAcademy®

**“Learning excellence.
Sharing experience.”**

That's the motto we pursue in our constant efforts to improve the professionalism of our DriveAcademy® training courses and services and develop new learning formats. This is an important issue because the degree of automation of machines and production facilities is increasing steadily, and today's automation solutions are more complex and sophisticated than ever before. “Industry 4.0” will present us all with difficult challenges – while simultaneously offering a host of opportunities. That's exactly why we're creating a suite of educational tools that will meet the needs of the changing world we work in.

What we offer our customers

As one of the leading specialists in drive technology and drive automation, SEW-EURODRIVE offers its customers practice-oriented product and technology training courses provided by the DriveAcademy®.

- Standard product training sessions
- Custom-tailored training courses
 - held centrally at the DriveAcademy®
 - decentralized at the customer's location

Range of topics of training courses

- CCI-certified qualification program: SEW-EURODRIVE drive technology
 - Project planning
 - Control cabinet technology
 - Decentralized drive systems
 - Safety technology

- Control technology
- Maintenance and repair
- Condition monitoring
- ATEX
- And much more

Our training models and facilities

- Portable training models for training courses at the customer's location covering an inverter type and a motor type with or without an encoder
- Multifunctional, application-specific training models for a variety of drive series such as MOVIDRIVE® B, MOVITRAC® B and MOVIAxis®, as well as special models and accessories
- Training facilities with various technologies from different industries and applications such as warehouse logistics, general conveyor technology, handling, robotics, etc.

Our services

- Organization and implementation of German and international SEW-EURODRIVE events, customer events and training courses
- Participant administration from invitations, registration and on-site service to preparation of certificates
- Arranging locations, catering, entertainment, conference accommodations and transfer

Maximum customer benefit thanks to a unique product portfolio
